A LETTER  
OF THE  
Rt. Rev. Herman Joseph Alerding, D. D.,  
TO THE  
Clergy and Laity of the Diocese of Fort Wayne, Ind.

---

Indefatigable zeal sustained by noblest motives has built up St. Joseph's College. In this College many candidates of the priesthood lay the foundation of a useful life, well founded in faith and morals, to reap a rich harvest for God's glory and the salvation of souls. They here imbibe apostolic, disinterested, self-sacrificing, and withal, humble zeal. What is a learned priest without this zeal?

The priests of the Diocese of Ft. Wayne can do much for St. Joseph's College. Their attention is invited to examine the status and methods of this institution, in order that they may conclude how St. Joseph's College can be recommended conscientiously to parents for their sons. Knowledge and virtue are found there. What better inheritance could parents leave their sons?

The College is intended for Catholics exclusively; it insures a thorough education, and, more than all, it inculcates moral principles, without which all knowledge is, if not a curse, certainly a failure.

Incidentally it may be mentioned that the Diocese of Ft. Wayne owes the fathers of the Most Precious Blood a debt of gratitude for the cheerful and ready assistance in sharing with the Diocesan priests, when called upon, the burden of pastoral labors. This assistance has never been refused by these good fathers, when it was in their power to give it.

May St. Joseph's College flourish and enjoy the fullest confidence of parents and the heartiest good will and patronage of priests, especially of the Diocese of Ft. Wayne, in which the College has its home.

†HERMAN JOS. ALERDING,  
Bishop of Fort Wayne.

*Ft. Wayne, May 8, 1901.*

# Prospectus of St. Joseph's College.

## General Remarks.

St. Joseph's College, conducted by the Fathers of the Most Precious Blood, was opened in September, 1891. It is incorporated under the laws of the State of Indiana, with powers to confer degrees and academical honors.

The growth of the College has been a steady one, each year adding to its equipment and efficiency. At present the course of instruction comprises the Classical, Normal and Commercial Departments, Civil Engineering, Music and other subsidiary studies.

## Buildings.

**MAIN BUILDING.**—Situated on a slight eminence, and overlooking the park and lake, this building presents an imposing appearance. It is a structure of three stories and basement, with a frontage of 265 feet, and affords accommodation for about 200 students.

The basement contains several large and cheerful refectories. On the first and second floors are found the chapel, study-halls, library, class-rooms, post-office, parlors and private rooms. The third floor is reserved exclusively for the dormitories.

**FACULTY BUILDING.**—Contains the private rooms of some of the Professors and Students.

**DWENGER HALL.**—This is a large and handsome building, lately erected for the accommodation of visitors and the comfort of sick students. It is so named in honor of the Rt. Rev. Joseph Dwenger, second Bishop of Ft. Wayne, who co-operated in the founding of the College. The appointments of this building are very complete, and have been made with a view to comfort and the principles of hygiene.

**THE GYMNASIUM.**—Facing the campus, this building occupies a conspicuous place among those on the grounds. It has a length of 120 feet, width 95, and covers a ground area of

THE NEW CHAPEL.

over 10,000 square feet. It was erected to meet the requirements of athletics, but it also contains the music and reading rooms, and a stage for the production of plays and other entertainments. The stage is provided with several sets of fine scenery, and is protected by a steel curtain. The basement contains two bowling alleys, shower baths, and a large hall for gymnastic exercises.

All buildings are fitted out with the improvements that render them pleasant and safe, such as steam-heating, electric light, fire escapes, fire extinguishers, etc.

An artificial lake and very extensive play-grounds near the College offer every facility for athletic and health-giving sports and exercises, such as boating and fishing in summer, skating in winter, baseball, basketball, handball, bowling, tennis, etc.

### **Our New Church.**

Owing to the increased attendance of the last few years, which taxed the capacity of the Chapel to the utmost, it was decided to erect a Church, which is now in course of construction. It will be a very handsome structure in the Romanesque style of architecture, and will cost about \$85,000, exclusive of the cost of excavation and hauling material. The front is flanked by two towers of the height of 130 feet; the extreme length is 172 feet, and the width 84 feet. The material is red brick with stone trimmings. It will, no doubt, be one of the finest college churches in the country.

### **Sisters' House.**

Some fifty feet to the west of the Church will be erected a Sisters' house, in which there will also be the kitchen and the store-rooms. It is thought that the space gained by the vacation of the Chapel, the Sisters' quarters, store-rooms, etc., will afford accommodation for about a hundred students in addition to the two hundred residing here at present.

### **Location.**

St. Joseph's College is located near Rensselaer, Jasper County, Indiana.

Rensselaer, the railroad station for Collegeville, is the county seat of Jasper County, and is situated on the main line of the C., I. & L. R. R.—known as the "Monon Route"—about 48 miles from Lafayette, Ind., and about 72 miles from Chicago, Ill.

All railroads running to Chicago from the east and south cross the "Monon Route" at different points, and thus afford easy access.

On arriving at Rensselaer, passengers will find a depot 'bus ready to convey them to Collegeville for 25 cents, day or night.

Collegeville is connected with Rensselaer by telephone, and thus enjoys immediate communication with all outside points through long distance telephone or the Western Union Telegraph Office.

The College has its own post-office, and letters should not be addressed to Rensselaer, but to *Collegeville, Ind.*

### **Course of Studies.**

The regular course of studies in the Classical Department comprises six years, in the Normal four years, and the Commercial three years.

Students who have completed their respective courses and passed a satisfactory examination, are entitled to a Degree or Diploma.

The following branches are taught: Christian Doctrine, Latin, Greek, English, German, French, Literature and Elocution, Rhetoric, Poetry, History, Geography, Book-keeping, Type-writing, Stenography, Mathematics, Physics, Astronomy, Chemistry, Civil Government, Pedagogics, Physiology, Civil Engineering, Mechanical and Architectural Drawing, Botany, Geology, Penmanship, Instrumental and Vocal Music.

For the benefit of the pupils not sufficiently advanced to enter one of the regular courses, there is a Preparatory Class.

English and German classes in the Preparatory Course will be opened the First Session only; at the beginning of the Second Session a Preparatory Class in Latin will be taken up.

Students desiring to begin any of the optional studies must bring a written request of their parents or guardians to that effect; but once begun, these branches cannot be dropped by the students during the session without the consent of the Faculty. From the optional branches, however, pupils are excluded who do not give satisfaction in their obligatory studies.

All books needed can be obtained at the College; new books at current rates, and second-hand books at greatly reduced prices.

Books sold to students will be bought by the College at the end of the term.

The scholastic year consists of two sessions of five months each, beginning respectively in the first week of September and the first week of February.

The scholarship of a student is determined by oral and written reviews, which are held every two months. A bulletin, showing the results of these examinations, will be sent to the parents or guardians.

A general written examination takes place at the end of each session, the result of which will be forwarded to parents or guardians, together with statement of financial account.

For promotion to a higher class at the beginning of the term, the student must have acquired an average of at least 70% in the last session of the previous year.

## To Parents and Guardians.

---

To enable us to educate both heart and mind of those entrusted to us according to strictly Catholic principles, **none but Catholic students** will be admitted.

Parents or guardians intending to place their sons or wards in College are kindly and earnestly requested to do so at the beginning of the First Session. Students arriving after the opening of a session, as a rule, prove to be a drawback to their classmates, and a source of great annoyance to their professors.

Once admitted, they must remain until the end of the session.

Students leaving before that time—except in cases of protracted illness or dismissal—cannot expect that any money be refunded or a deduction from the regular charges be allowed by the Institution.

Leave of absence from College will not be granted to students except in cases of urgent necessity.

Unless applicants can present satisfactory testimonials of good character, they need not apply for admission.

Applicants for admission, who have as yet not attended any college, must furnish a character-certificate from their respective pastors; those coming from other colleges are, moreover, required to present their testimonials received in the college they last attended.

All new students are examined and placed in the classes for which they are best fitted according to their attainments; promotion, if merited, may be made afterwards.

Parents and guardians are respectfully reminded that the management of the classes belongs entirely to the officers of the College, who will know what is best adapted to further the interests of students and to bring out the desired results.

Professors will extend to students all possible aid, but a regular course of private lessons will not be given except for special reasons, and at an additional charge.

The domestic department is in charge of the Sisters of the Most Precious Blood.

The College depends for its maintenance, to a great extent, on the fees paid for board, tuition, etc., and a prompt compliance with the request for payment in advance is earnestly solicited.

No advance will be made by the College for any expenses of students. Parents or guardians wishing the Institution to pro-

GYMNASIUM.

cure any articles for their sons or wards are required to deposit an amount equivalent to the cost of such articles.

Students will be allowed to retain pocket-money; but, unless deposited with the treasurer, the College will not take any responsibilities for the loss of money.

Remittance should be made by Bank-Draft or Registered Letter; money may also be sent by Post-Money Orders through Collegeville post-office. **All Express (American Express Co.) and freight, however, must be addressed, charges prepaid, to Rensselaer, Jasper County, Indiana.**

Should a student become sick, great care will be taken of him. The College has secured the services of a physician, who, after many years of study and practical experience, is eminently qualified to fill the position of attending to the bodily welfare of the students. In case of serious illness, a doctor from the city will be called, and parents or guardians will receive timely notice.

Towards the end of the First Session, or at the beginning of the Second, the Spiritual Exercises, known as the Retreat, are held. They last from three to four days, and are conducted by a Missionary Father or a member of the Diocesan clergy.

### **Student's Outfit.**

Parents or guardians are strongly urged to see that their sons or wards come well supplied with all necessary articles of use and wear, so that the students may have no plea for paying unnecessary visits to the city, as such visits may be the cause of useless expenses, loss of time, and prejudicial to good discipline.

The following articles are required:

- |                                  |                   |
|----------------------------------|-------------------|
| 4 Complete Changes of Underwear. | 1 Overcoat.       |
| 2 Suits of Clothes.              | 2 Pairs of Shoes. |
| 1 Hat, 1 Cap.                    | 6 Shirts.         |
| 6 Pairs of Stockings.            | 2 Night Shirts.   |
| 6 Towels.                        | 12 Handkerchiefs. |
| 6 Napkins.                       | 1 Napkin Ring.    |

Comb and Brush, Mirror, Soap.

The full name or respective number should be marked on every article.

Arrangements have been made with a wholesale house to furnish good and durable uniforms for about ten dollars. While we do not oblige students to buy any of these suits, we would strongly advise them to do so, as they are very neat and at the same time economical.

## Rules of Discipline.

---

The time of youth is the period during which the character of the young must be formed. Without a good character knowledge is of little value. For the formation of a good character discipline, though mild, yet firm, is necessary, and without it no satisfactory results can be expected in a College. To maintain proper discipline it is necessary to lay down and enforce such rules as will promote the spiritual and temporal welfare of the students.

The following rules, in particular, are calculated to produce this effect:

1. Students are required to show obedience and respect to the Professors and Prefects of the College. Such students as are found to exert an evil influence upon others, or endeavor to incite and promote a feeling of discontent or insubordination, will not be permitted to remain at the College.
2. Since Moral and Religious Training form the most important part of education, all students are required to make the Annual Retreat, to receive the holy sacraments of Penance and Eucharist at least once a month, to hear Holy Mass daily, and to attend Benediction with the Blessed Sacrament every evening. Students preparing for the priesthood approach the sacraments at least twice a month.
3. The order of the day, that is, the time fixed for study, recitation, prayer, recreation, silence, etc., must be punctually observed. All running, loud talking, shouting and whistling inside the College building is strictly forbidden at all times, especially in the Study Halls, Corridors, Refectories and Dormitories.
4. No student will be allowed to leave the College grounds, to attend calls from visitors, to enter private rooms or workshops on the premises, or to visit the infirmary, without having first obtained permission to that effect. Students who visit the city without permission are liable to be expelled.
5. Vulgar and profane expressions, and such as are injurious to good morals and religion, will not be tolerated.
6. All undue familiarity is strictly forbidden; i. e., the students are warned against keeping too frequent and exclusive company with one and the same of their fellow-students: on the

contrary, all students should consider and treat one another as brothers.

7. Students injuring desks, chairs, windows, or any property of the Institution, are held responsible for such damages.
8. The students are also responsible for the proper order and neatness of their desks, and of the study-hall and class-room floors. Waste paper and other refuse must be thrown into the waste basket. Spitting on the floor in any part of the College buildings is strictly prohibited, since it is very uncouth and may prove dangerous to the health of the inmates of the College.
9. In favorable weather no one is allowed to remain indoors during free time. All students are expected to join in the games and exercises of the recreation hall or playground. *Students wishing to indulge in football or swimming must present a written permission from their parents or guardians.*
10. The use of intoxicating liquor is forbidden under heavy penalty.
11. The use of tobacco is prohibited. Students, however, who furnish a written request from their parents or guardians will be allowed to smoke at certain times and under certain restrictions. Cigarettes are absolutely prohibited.
12. All letters addressed to students, and also those written by students, are subject to inspection by the President, or Master of Discipline. As a rule, only Catholic newspapers will be tolerated. Letters and papers will be handed to students on afternoons of Wednesdays and Saturdays only, unless it be some important matter. To prevent improper reading or concealing of forbidden articles, the right of examining trunks and desks of the students is reserved to the President, or Master of Discipline.
13. Parents and friends of the students are welcome at the College at any time of the year, but it would be preferable to receive them on Sundays and afternoons of Wednesdays and Saturdays, which days are set apart for recreation.
14. If a student is unable to attend a class, he must report in advance to the respective Professor.
15. Students leaving the Institution during the year for a short visit, will report to the President before leaving and immediately upon their return. Those studying for the Holy Priest-

hood are required to bring from their respective Pastors a certificate of good conduct during vacation.

16. If a student should consider himself injured or ill-treated by another, he must not avenge himself, but put his case into the hands of the President. Hence, every student who thinks he is justified in making complaints, must do so to none other but the President, or Master of Discipline.

### Degrees.

The Degree of Bachelor of Arts is conferred on students who successfully complete the Classical Course, passing satisfactory examinations in all the obligatory branches, viz: Religion, Logic and Ethics, Latin, English, Greek, Mathematics, and History. Students not preparing for the priesthood will be permitted to waive an examination in one of these branches, provided they obtain the consent of the Faculty and maintain the requisite standard in their other classes.

Towards the end of each year, a Board of Examiners will be appointed by the Faculty to examine the Graduating Class. Students making an average of 84% and not falling below 70% in any branch are entitled to the Degree of A. B. Those who obtain higher per cent, will receive the Diploma with the following distinctions: (88—92) *cum laude*; (92—96) *magna cum laude*; (96—100) *summa cum laude*.

In the Normal and Commercial Departments a Diploma is awarded to students finishing the prescribed course, and making in their final examination an average of 80%, not falling below 70% in any branch. The obligatory branches in the Normal Course are: Religion, English, Mathematics, Pedagogy, Physiology, U. S. History, Geography, Civil Government, and Penmanship.

In the Commercial course: Religion, English, Bookkeeping and Commercial Law, Geography, Type-writing, Shorthand, Mathematics and Penmanship.

Students desiring a Diploma in German or Music must pass an examination in these branches.

All accounts must be settled before graduation.

REMARKS.—The full Collegiate course is recommended also to students preparing for a professional or business career. With a complete liberal education as a basis for future study and work, the young man's chances for success are vastly improved.

## Surveying.

---

To enter this course the student must have a good knowledge of English and Arithmetic. The requirements are therefore practically the same as for entrance into the Freshman Class.

No irregularity in the attendance of classes in other important branches, such as Latin, English, Mathematics and History, will be permitted to students of this department.

*Civil Engineering.*—1. *Surveying* (Field Work): Preceded by instruction in Geometry, Trigonometry, Logarithms, etc. Instruments are used from the beginning, as the principles of surveying can be more easily learned, when the study of the text book and the use of the instruments are combined. An outline of the work is as follows:

*I. Preliminary Surveying.*

*II. Land Surveying:* Subdivision of land, computing of acreage, city survey, location of streets, sewers, platting of the work, adjustment of the level, etc. Triangulation, measuring angles with transit, leveling, establishing grade lines, etc. Adjustment of transit, topographical survey, etc.

*III. Railroad Surveying:* Preliminary survey with transit, chain and level. Topography with Locke level. Permanent location. Curves, cross sections and computation; turnouts and platting of all work.

*IV. Office Work:* Study of text and reference books, general instructions, lettering, drawing, etc.

Surveying will be continued during the summer vacation if a sufficient number of students apply.

## Remarks on Course of Instruction.

### Latin.

For the classical student who expects to enter a seminary to prepare for the priesthood, a thorough knowledge of the Latin language is necessary for success in his philosophical and theological courses. In order to insure a good knowledge of Latin, particular attention is given to this branch at the very beginning.

The Preparatory Class takes up the study of Latin with the second term of the first year, and studies the declensions in Schultz's Grammar, translating at the same time corresponding exercises from Schultz's Latin Exercises.

The First Academic Class thoroughly reviews its work done in the previous year, and goes as far as the irregular verbs of Third conjugation. During this year great care is taken to have the declensions and conjugations well learned. The student is daily required to make an oral translation of the Latin exercises in Schultz's exercise book into English, and written translation of the English into Latin.

Many students that are well advanced in the common branches, and are therefore able to devote more of their time to Latin omit the preparatory year altogether, and commence with the First Academic Class. If, however, a student following this plan finds it too difficult to keep up with his class, he is permitted to drop out and to begin anew with the Preparatory Class in February.

The Second Academic Class commences with the irregular verbs, takes the adverbs, prepositions, conjunctions and syntax to "Use of the Infinitive"; exercises are continued as in the first class. By reading short Latin fables the student is introduced to connected discourse, and in the second session the class begins the translation of *Historia Sacra*.

The Freshman Class finishes the grammar, reads *Viri Romae*, *Cæsar*, and selections from *Ovid*; it translates the first part of "Rockliff's Prose Exercises" into Latin.

The Sophomore Class continues "Rockliff's" Exercises and reads *Cicero's* orations. The class also reviews the grammar towards the end of the year, the Latin language being used as the medium of instruction.

The students of the Junior Class write original Latin compositions, study rules of Prosody, read Horace, Virgil, and select hymns from the Roman Breviary.

As ours is an age of progress it becomes imperative for educated men in all walks of life to keep pace with the spirit of the age. According to the decrees of the Third Plenary Council of Baltimore (Tit. V, No. 145) the ordinary course of collegiate studies should embrace no fewer than six years. Hence, after due consideration, it was resolved to add another year to the curriculum of studies in the classical department. This will afford students of the Senior class an opportunity of acquiring a fundamental knowledge of Logic and Ethics, and enable them to perfect themselves in the ordinary branches.

Degrees will henceforth be conferred only on such students as have completed the entire course.

---

### English.

---

During the first years of the English course, reading, grammar, spelling, and composition are taught. The latter years are devoted to the study of Rhetoric and Literature, and to exercises in the various forms of the literary art.

Students who may have been in some advanced course in English at home may be required to go over the same or similar work. While an early acquaintance with good literature and the works of standard authors is very desirable, and is also given, it must be preceded, or at least accompanied, by a thorough study in grammar and composition. Thoroughness is a marked feature of our classes, and a high standard is maintained in every branch of English.

A student will be admitted to a higher English class if his knowledge of grammar and composition and general command of English warrant the promotion. New-comers are not admitted definitely into any class, until after a two weeks' trial.

The History of English Literature is read with attention to the different periods, their spirit and the influence exercised by them upon subsequent epochs. Minor authors are noticed only for certain peculiarities or as belonging to a group, but a more

intimate acquaintance is formed with the main authors, their character and influence.

The chief introduction to the authors and to English Literature is, of course, by means of the masterpieces selected annually for class-study, a close study of which is of great educational and cultural value. Those read last year are mentioned in the "Course of Instruction."

Themes are required once a week in the lower, and every two weeks in the higher classes. Sincerity, originality, and good form and structure are insisted on. In addition to the regular exercises, students of the higher classes keep a composition book, variously known as the "Miscellany", "Commonplace Book", and "Sketch Book", into which they put their musings on matters light and grave. These are submitted for inspection once a week.

Students find in the Columbian and Aloysian Literary Societies an excellent aid and incentive to their work in English. Oration, debates, essays, and declamations give them an opportunity of making practical use of the knowledge acquired in the class-room.

The *St. Joseph's Collegian*, a magazine published bi-monthly by the students, and containing fifty-six pages of reading matter, has been found an excellent incentive to literary effort. It occupies a high rank among the college journals of the country, and the contributions in prose and verse evince no mean literary power and culture.

---

### Greek.

---

The advantages of Greek, especially to the students preparing for the priesthood, cannot be doubted. It is invaluable as a mental discipline—a fact realized after a few months' study of this language. It is also an aid to the study of English, and introduces to the New Testament, the Church Fathers, and the Greek Classics. No efforts are spared to impart to the student an adequate knowledge of this language.

The course comprises five years, beginning with the second year.

---

### German.

---

We have no hesitation whatever in asserting that the facilities offered by St. Joseph's College for the study of German are

not surpassed by any similar institution in the country. We have practically two courses in this important branch; one for the English-speaking students, and one for those who are already proficient in the German language.

The usefulness of a knowledge of this language cannot be over-estimated, and its popularity is attested by the fact that over 90 per cent of students with whom it is left optional attend the German classes.

---

### **french.**

---

The study of French is strongly recommended to all students of the classical department. The entire course covers four years—a period sufficiently long to enable a diligent student to obtain a good practical knowledge of the language.

---

### **Mathematics.**

---

From the very dawn of education Mathematics has been considered one of the most important and practical studies. The proficiency of the ancients therein is attested by their monumental engineering feats and architectural triumphs. Its value to the Schoolmen of the Middle Ages is manifest in their authoritative treatises on philosophical and theological subjects. The acute perception, deep penetration, and irresistible logic which characterize these were developed principally, if not exclusively, by the preparatory courses in Arithmetic and Algebra, Geometry and Trigonometry. And the importance of these studies is more universally recognized today than ever before. Every business firm requires competent, some of them even expert, accountants. The mastery of the mechanical sciences is synonymous with excellence in applied mathematics. The opportunities for success in the engineering and architectural professions are multiplying with the growth of our country, but those who would embrace these opportunities must prepare themselves by the study of mathematics. Conscious of these facts, St. Joseph's strives not only to maintain, but even to increase, the prestige of Catholic Colleges in this science. Those interested in the same will find ample proof of this statement in the detailed references to the respective classes.

## Sciences.

---

Although this College does not presume to offer a complete scientific course, nevertheless special efforts are made to impart to its students a general knowledge in the various branches of natural sciences.

The course begins with Botany in the Freshman Class. The text-book used is supplemented by lectures of the professor on the commercial value and medical qualities of plants.

Physics is begun in the Sophomore Class and continued through the Junior Class in order to do justice approximately to this very interesting branch of natural sciences.

Young's Lesson in Astronomy, comprising Descriptive and Mathematical Astronomy, together with practical observations, form another branch of study for Junior and Senior Classes. In Geology there will be treated in accordance with the conservative views and principles of our Holy Church: The Mosaic Record and Geology, Evolution, the Deluge, and God's testimony written in Nature's book.

---

## Elocution and Oratory.

---

Following the present trend, much attention is given to this part of the course. Students join one of the Elocution classes in the second year academic, but help is already extended to pupils of the preparatory and first year classes through the practical instruction of the Director of the Junior Literary Society, of which they may become members.

One hour a week is devoted to special drills and instruction by each of the Elocution classes, and much practical work is done in the Literary and Debating societies, in which the members have the opportunity of appearing on the programs several times a year, in recitations, readings, debates, orations and plays.

A class in parliamentary law is held at the meetings, and help is given to the members in preparing their parts, and afterwards by public criticism.

### Normal Course.

---

Since greater demands are being made on the student aspiring to the profession of teacher, we have found it imperative to extend our Normal Course to four years. We must agree with educators of to-day that a teacher should have a knowledge of Literature, General History, Physics and Botany, and have therefore added these branches to the curriculum of the Normal Course. We feel confident that a teacher equipped with the knowledge given in our Normal Department will reflect credit upon himself and the community in which he labors.

A young man with a good primary education should, however, be able to meet the requirements for entrance into the second year Normal.

## Commercial Department.

---

In this age of sharp competition it is very important that the commercial student acquire a thorough knowledge of all subjects pertaining to the transacting of business. Perhaps in no other profession does the lack of proficiency make itself so felt, and is so soon followed by failure as in the commercial world. For this reason much attention is given to all the subjects pertaining to the transaction of business. In order to enable the student to make a practical application of his bookkeeping knowledge an extensive business practice is carried on between the members of the respective classes.

The student is also required to go through a course of Business Correspondence. The ability to write a good business letter is the best recommendation that can be given to a candidate for a position, and will greatly help him to promotion. By writing letters that have a practical bearing on every possible business transaction the student is given an insight into the wonderful business methods of to-day.

Typewriting and Shorthand form an essential part of a complete business course. For this reason much time and much attention is devoted to the student to acquire proficiency in these branches. The Pernin System of Shorthand is taught, which, owing to the many advantages it has over other systems, is comparatively easily mastered. This is manifest from the ever-increasing popularity of this system. Having acquired an elementary knowledge of the system the student is led to practise writing daily exercises touching every matter of business and later to write from dictation.

It is a well known fact that deficiency in spelling is a very common weakness with all classes of students. Therefore students of the commercial department are drilled regularly in spelling and correct application of words, as supplementary work to the regular English course.

## Music.

---

*Vocal*—All students take part in the "Congregational Singing" at divine service.

On Sundays the Ordinary of the Mass is often rendered in plain chant, and Vespers are sung strictly according to the Roman liturgy.

On great feasts of the Church, and other special occasions, polyphonic music is rendered by a select choir. To become members of this choir students must take special interest in music and be sufficiently qualified.

Instructions in vocal music is given to all free of charge.

All students preparing for the priesthood must attend lessons given in plain chant and vocal culture.

*Instrumental*—Great facilities are offered to those who wish to become proficient in instrumental music. Several pianos, reed organs, and a pipe organ with two manuals, are at the disposal of the students. Lessons are also given on the violin, flute, clarionet, and all brass instruments.

Students sufficiently advanced are admitted to the orchestra or band.

There is a special class of harmony, including thorough-bass and composition for advanced scholars; but all pupils are early acquainted with the theory and first principles of music.

Students are encouraged to give public exhibitions of their skill at the meetings and programs of the various societies of the College, and on public occasions.

## Religious.

### The Marian Sodality.

This Sodality was canonically erected in the College Chapel on the 8th of December, 1894, in honor of the Blessed Virgin Mary, under the title of the Immaculate Conception, and placed under the special patronage of St. Aloysius.

The object of this Sodality is to promote filial love and devotion towards the Mother of God, to encourage the practice of virtue and piety among its members, who by this Sodality become pre-eminently Children of Mary.

The principal regulations are: To approach the Sacraments of Penance and Holy Eucharist at least once a month; to recite the rosary daily, and even during vacation, when absent from College, to keep up these pious practices as much as possible; to avoid all coarse and unbecoming language; to imitate their model in her exalted virtues, especially in her holy purity.

All students have access to membership in this Sodality. Once admitted, a student may remain a member for life-time; absence from College does not deprive him of the privileges of the Sodality; on the contrary, his name appearing on the membership list, he will ever be remembered by his former fellow-sodalists in their prayers, and should he depart this life, the Office of the Dead will be recited, and other appropriate prayers offered up for the repose of his soul.

## St. Stanislas' Altar Society.

---

This Society has been organized for the purpose of training the students to serve at Highmass, and especially to enhance the solemnity on feast days. Occasional meetings are held at which the rubrics of the Mass are explained to the acolytes. Only small boys are admitted to this Society. The Altar Society numbers at present 30 members.

### Columbian Literary Society.

---

The object of this Society is to afford its members every facility in the exercise of their literary and dramatic powers, and the cultivation of their moral and social qualities.

Any gentleman who is a student of St. Joseph's College, and who possesses the necessary qualifications, may, by application through any member, become an active member of this Society upon two-thirds of the members consenting by a secret ballot to his admission.

Regular meetings are held and programs rendered throughout the scholastic year, every second week, in the College Hall, which is fitted out with a stage and is well adapted for the purpose.

Every member must, from time to time, take an active part in the programs rendered.

The programs consist of orations, recitations, debates, music, plays, and the reading of the society paper, the *Columbian*.

Entertainments of general interest, and dramatic plays, are given by the Society on public occasions in the College Auditorium.

The Society has also for its exclusive use a reading room, called the Columbian Hall, which is furnished with a fine library containing 700 volumes, well selected, and some of the better class secular magazines and reviews, and nearly all of the representative Catholic publications, and about 50 College Journals. This Hall possesses also a collection of national and natural curiosities, which is growing rapidly in number, value and interest.

## Aloysian Society.

Students who have not yet entered upon their academic course, and who prove of studious habits and good conduct, may apply for admission into this Society.

The immediate object of this Society is to afford its youthful members opportunity of practice in elocution, and thus to develop in an easy manner their intellectual abilities. Besides this, a spirit of friendship and union is fostered, together with social refinement and a virtuous character, qualities indispensable to a model student and Catholic gentleman.

Corresponding to the needs of the Society and the merits of its youthful members, a special reading room—the Aloysian Hall

—was set apart for their exclusive use. In addition to a case of interesting curiosities, this hall contains the Society's library, reading tables, provided with a dozen juvenile papers and pamphlets—all tending to make the room a place of exquisite pleasure and great benefit to its frequenters.

Every fortnight regular meetings are held, largely consisting of literary work, such as select readings, recitations, declamations, dialogues, orations, and the reading of the Society's paper, the *Aloysian*.

Aside from the above work, the Society renders annually four public programs in the College Auditorium.

### German Literary Society.

---

A German Society was organized to assist the students in the attainment of a fluent and correct use of the German language.

The meetings are held thrice a month, and consist of regular business proceedings and small programs with short essays, poems and debates, followed by extempore addresses and conversation, all in the German tongue. Public entertainments are given at stated times during the scholastic year.

### The Alumni Association.

---

This organization was formed June 17, 1896, after St. Joseph graduated her first class.

It has for its object the preservation of that union which is characteristic between students and *Alma Mater*, and it seeks to renew in its annual meetings the bond of friendship practiced so faithfully during the student-life. It serves to bind class to class in promoting the interests of St. Joseph's College, and in furthering the noble cause of higher education.

Every student graduated by the Faculty of St. Joseph's College is eligible to membership.

## Military.

Many are the benefits of a military training. It affords a knowledge of military tactics; it ingrafts habits of subordination and command; it refines personal appearance and develops gentlemanly bearing and conduct. To secure these benefits to the students is the object of St. Joseph's College Volunteers.

Herein the manual of arms, the maneuvers, and all the ordinary evolutions are taught according to the new Infantry Drill regulations commenced immediately after the September term. The drills are semester and are continued regularly until Thanksgiving. They are so arranged as not to interfere with studies. The arms and accoutrements used are furnished by the College.

## Athletics.

---

Education is the harmonious development of man, morally, intellectually, and physically. This three-fold development is accomplished by religious training, scientific study, and athletic exercise. The educational institution, which neglects even the last, the least of these, does not offer the student a complete course. Manifold indeed are the benefits of rational athletics. They evolve and expand the faculties of the body and preserve and promote its health; they train the mind to form quick and correct judgments and habituate it to resourcefulness in emergency; they school the student in forbearance and self-control and practice him in the gentlemanly accomplishments of tact and courtesy; they encourage friendly emulation and prepare for the more strenuous competition of after life.

Mindful of these facts, St. Joseph's properly provides its students with every accommodation and opportunity for reasonable participation in all sorts of approved athletics. Its spacious campus with parade grounds, baseball diamonds, and tennis courts, affords more than sufficient facilities for all out-of-doors games and sports; its commodious gymnasium with a full equipment of gymnastic apparatus invites and urges to every indoor play and exercise. With the mere mention of these advantages further commendation of our athletics would seem unnecessary. However, it may be stated in conclusion that they are pursued systematically under the direction of the Athletic Association and not their least attractive feature is the series of inter-scholastic games, regularly arranged with neighboring institutions.
